Phil Greene Cabinet

At Phil Greene Cabinet we build custom presentation furniture, equipment credenzas, equipment rack boxes, teaching stations, control room consoles, studio background sets, conference tables, home theater walls, commercial furniture and cabinets including solid surface countertops. We work with our customers to design and build a product that best fits their requirements and cost considerations. We use the highest quality materials and hardware in fabrication of all our products. This catalog represents many of our presentation furniture designs and examples of some of the custom control rooms and studio sets we have built. The prices are not included in the catalog because each project is a custom project designed to meet the requirements of the customer. The cost decreases with quantity with respect to lectures, teaching station and rack boxes. We do not have a list of options because we can virtually supply anything as part of the custom design. Quotes are available at pgcabinet.com

Custom Presentation Furniture

General Design

The presentation furniture in this catalog is a representation of the some of the most popular designs that we build. The designs featured in this catalog may not have a particular feature you are looking for or may have features you don't need. All our furniture is custom built to fit your needs and features can be added or deleted as needed. Custom designs can be developed using the catalog furniture as a base or a new design can be developed to fit the particular specifications.

Materials

All furniture is built from the highest quality materials and finished with a durable 3 coat M.L. Campbell Magnamax finish. All the furniture is base priced using Oak wood and wood veneer core board with a natural finish. Stain colors for the furniture can be chosen from our stain samples or can be custom finished to match a provided sample. The interiors are also finished for long term stability. The countertops are Formica brand Ebony Oxide laminate (black with a pattern) or your choice. All the furniture can be fabricated from almost any wood or laminate. The most popular woods are oak, maple and cherry. The laminate can be any available color from the Wilsonart, Formica or Pionite design collections.

Hardware

All presentation furniture in this catalog come with either 3"or 4" casters, the back two being total-lock. The casters can be eliminated and a floor mounting plate included for stationary installations. The front access panel, equipment doors, document camera drawer and storage drawers are keyed alike. Hinges, pocket door hardware, drawer slides and door pulls are of the highest quality and weight supporting standards.

Rack Equipment

The presentation furniture can be designed to accommodate Middle Atlantic BRK rack boxes so that equipment can be pre assembled and slid into the space. The rack equipment area can be designed to accommodate pull out racks, rack rails or shelves. The access panels in the front of the furniture may eliminate the need for a pull out rack.

Our Goal

Our goal is to build the highest quality products, with features that make your equipment installation easy and meets your requirements and cost considerations.

MOBILE PRESENTOR

This was developed as a crash cart to be used in a classroom if the room system failed. It also is a great little system to use a mobile presentation unit from classroom to class room.

Specifications:

- 24"W x 24"D x 41.25
- Work surface black laminate (*other colors optional)*
- Base unit; oak wood and oak veneer with a clear 3 coat Campbell Magna-Max finish. *Maple and cherry wood optional stain color optional*
- Hole cut for self powered speaker amplifier
- Flip down door and space for video projector
- Hole cut in side for interface panel
- Rack area space has rack rails with 10RU of space
- Door on equipment area has cutout for VCR/DVD
- Retractable AC power cord
- Drawer at bottom will hold a wolfvision document camera
- Flip shelf on side of unit
- Exhaust fan in projector area
- Removable panel for access to back of equipment
- 4 casters, all are total lock
- Keyed alike locks
- Custom cut outs can be cut in the side for cable access if necessary.

Phil Greene Cabinet
Teaching Stations and Special Design
Presentation Furniture

Every customer has different needs in presentation furniture; we can design and build custom furniture with your needs in mind.

Phil Greene Cabinet
Equipment Credenzas and Rack Boxes

The electronic equipment used in today's classroom and conference rooms needs a place to be racked. Large flat panel monitors need a base cabinet. We can design and build a credenza or rack box to accommodate your needs.

Phil Greene Cabinet
Conference Tables

Today's conference tables need to be designed to accommodate video conferencing, have electronic connectivity for laptops and concealed pathway for wiring. We can design a conference table of any size and shape to fit the needs of the room with holes and cutouts for microphones, interface boxes and wiring pathways.

Television Studio Sets and Backgrounds

We design, build and install television studio sets and backgrounds. Our broadcast sets can be seen on the air at WSTM-TV Syracuse, WKTV Utica, WWNY-TV Watertown, KIMO-TV Anchorage, and WPBN-TV Travers City. Set designs are developed from your ideas and budget concerns. We also design studio sets for college, high school and corporate environments. Some of our designs can be seen at SUNY Oswego and the Al Roker studio at Oswego, Utica College, St Bonaventure, Wayne High School, Time Warner Cable and MEDCO corporate Studio.
